

Environmental Policy

Eastwood & Partners recognise that the environmental impacts of running a business can be significant and are committed to reducing those impacts by way of a series of targets with the overall objective of achieving environmental best practice. The principles set out in this policy should therefore be incorporated into everyday operations. We are committed to:

- Complying with the requirements of the environmental legislation applicable to the business;
- Encouraging alternative transport arrangements such as cycling, public transport and car sharing to reduce the impact of transport.
- Minimising waste produced by the company through reducing, re-using and recycling materials where possible together with working towards becoming a paperless office.
- Continuing to operate an energy efficient heating and lighting system.
- Minimising noise disturbance, dust generation and other nuisances whilst undertaking site work.
- Providing designs which obtain the highest levels of environmental sustainability in line with the budget of our clients.
- Encouraging clients to become aware of environmental issues associated with their business.
- Promoting the prevention of pollution and reduction in energy consumption through our business decisions and consulting activity.
- Encouraging employees to develop environmentally responsible behaviour and awareness.
- We are committed to continuous improvement and will achieve this through:
 - The education and training of employees in environmental issues and the environmental effects of their activities.
 - The monitoring of progress and review of environmental performance on a regular basis.
 - Working towards producing an Environmental Policy Statement in accordance with BS EN ISO 14001.

The responsibility for this environmental policy lies with Martin Wood
